Strong communication, both written and spoken
Quick learner with a thirst for knowledge and education
Adaptable, with a positive attitude and enthusiasm for challenges

Learning Skills:

React language: YouTube ecommerce project
Practice Python: Codewars/ ChatGPT

Additional information:

Out of the Box Thinking. In my last portfolio project, I developed a unique feature that utilized three different columns   with distinct product categories and the ability to match product colors. This creative approach enhanced user experience and set the project apart.
Additionally, my third portfolio project at Code Institute was a distinctive game concept that I developed based on a childhood memory. To my knowledge, a similar game does not exist on the internet, highlighting my innovative thinking.
